SPATIO-TEMPORAL MODELS WITH `INLABRU`

19–22 October 2026 • Pamplona, SpainJafet Belmont · Sara Martino · Janine Illian

1 Welcome to the course!

- Welcome to the `inlabru` workshop in Pamplona!
- The aim of this workshop is to introduce you to a range of statistical modelling approaches, in particular the temporal, spatial and spatio-temporal modelling as implemented in the `inlabru` package.
- Workshop materials are available in the github repository

> ⚠ Important!

Please use the instructions provided here to install and check your installation *before* the course starts.

2 Learning Objectives for the workshop

At the end of the workshop, participants will have an understanding of:

- the motivation for and the challenges of analysing and modelling spatial data
- statistical models used to analyse spatial and spatio-temporal data
- the implementation of these models in the `inlabru` package
- how to independently analyse spatial data with `inlabru`

3 Intended audience

The workshop aims to cater for participants with a range of different backgrounds, who are interested in analysing data with modern spatial and spatio-temporal statistical modelling approaches.

4 Prerequisites

Participants should be familiar with the `R` environment, and general statistical approaches for modelling such as regression, analysis of (co)variance, and generalized linear models.

No knowledge of `R-INLA` or `inlabru` is required.

5 Schedule

5.0.1 Monday 19th

Time	Topic
9:00 - 9:30	**Welcome and introduction to the course**
9:30 - 10:30	**Session 1**: Introduction to `inlabru`
10:30 - 10:45	Coffee break
10:45 - 12:00	Practical Session 1
12:00 - 13:00	**Session 2**: The `inlabru` workflow
13:00 - 14:30	Lunch
14:30 - 15:30	Practical Session 2
15:30 - 15:45	Coffee break
15:45 - 17:00	**Session 3**: Time Series Models

5.0.2 Tuesday 20th

Time	Topic
9:00 - 10:00	**Session 3 cont.**: Time Series Models
10:00 - 11:30	Practical Session 3
11:30 - 12:00	Coffee break
12:00 - 13:00	**Session 4**: Introduction to Spatial Statistics
13:00 - 14:30	Lunch
14:30 - 15:30	Practical Session 4
15:30 - 15:45	Coffee break
15:45 - 17:00	**Session 5**: Areal processes

5.0.3 Wednesday 21st

Time	Topic
09:00 - 10:00	**Session 6**: Geostatistics
10:00 - 11:30	Practical Session 5
11:30 - 12:00	Coffee break
12:00 - 13:00	**Session 7**: Point Processes
13:00 - 14:30	Lunch
14:30 - 15:30	Practical Session 5 (cont.)
15:30- 15:45	Coffee break
15:45 - 17:00	**Session 8**: Spatiotemporal models

5.0.4 Thursday 22nd

Time	Topic
09:00 - 10:00	**Session 9**: Model comparison and evaluation
10:00 - 11:30	Practical Session 6
11:30 - 12:00	Coffee break
12:00 - 13:00	**Session 10**: Multi-likelihood/joint likelihood models
13:00 - 14:30	Lunch
14:30 - 15:30	Closing session and discussion

Time	Topic
15:30- 17:00	Practical Session 7 & General practice
